ACADEMIC ACHIEVEMENTS

- Secured 2nd rank in AI & ML specialization during First Year with a CGPA of 9.7

TECHNICAL SKILLS

- **Programming Languages:** C, Python, SQL
- **Core CS:** Data Structures & Algorithms, Object-Oriented Programming
- **Machine Learning:** XGBoost, Model Evaluation
- **Databases:** Relational Databases, Query Optimization
- **Web Technologies:** HTML, CSS
- **Tools:** Git, GitHub, APIs
- **Embedded Systems:** Arduino Uno, Sensors, Servo Motors

Language

English

Telugu

Hindi

ROHITH URLAPU

Computer Science Undergraduate (AI & ML)

Computer Science undergraduate specializing in Artificial Intelligence and Machine Learning with strong foundations in C, Python, SQL, and Data Structures & Algorithms. Experienced in building hardware-based systems and machine learning applications with real-world impact. Actively seeking software engineering internship and entry-level opportunities.

Education

B.Tech – Computer Science Engineering (AI & ML)

Vellore Institute of Technology, Chennai Campus

2024 – Present

Higher Secondary Education

Sri Chaitanya Educational Institution, Telangana

2022 – 2024

ACADEMIC PROJECTS

Designed and developed an **autonomous obstacle-avoidance robot** using Arduino Uno

- Implemented **ultrasonic sensors** to detect obstacles and measure distance in real time
- Controlled **servo motor-based directional movement** to dynamically avoid collisions
- Applied embedded programming concepts and efficient sensor-actuator integration
- Improved navigation reliability through real-time decision-making logic

Technologies: Arduino Uno, Ultrasonic Sensor, Servo Motor, Embedded C

Developed a **machine learning-based crop recommendation system** using XGBoost

- Predicted the **most suitable crop** based on soil parameters such as nutrients, pH, and moisture
- Integrated a **Knowledge Graph** to enhance contextual accuracy and decision support
- Designed a **web interface** to display recommendations in a user-friendly format
- Integrated **Weather API** for real-time climate data and **Government API** for live crop market prices
- Enabled **data-driven agricultural decision-making** for farmers

Technologies: Python, XGBoost, Machine Learning, SQL, HTML, CSS, APIs, Knowledge Graph

PROBLEM SOLVING & CODING PRACTICE

- Solved 283+ Data Structures & Algorithms problems on LeetCode
- Strong hands-on experience with arrays, strings, linked lists, stacks, queues, trees, and recursion
- Practiced writing optimized and clean solutions with time and space complexity analysis
- Focused on problem-solving using C and Python
